DIGITALS

Digital files are great if you wish to create your own items. There are a lot of online stores that offer cheap printing but beware you cannot always be sure you are getting the best from the images.

The amount of digital items offered have been reduced as we want to ensure that after all the time and effort all parties have put into creating your images, that they are printed to the highest quality.

As a photographer the project is not really finished until the image created has come to life in printed form. It's a little like an architect designing a building and never seeing it built.

Individually we offer two sizes of digital files or jpegs. These are downloadable directly from your gallery:

Social size digitals Suitable for sharing online £15

Full size digitals Suitable for printing £50

If you prefer your digital files come saved on a USB you can purchase a case or box.

These can only be ordered with a minimum of five digital files.

Digital files are also included in some of our packages.
